1. Introduction

Thank you for purchasing the CANARMOR Gas Mask. This manual will guide you through the setup, proper usage, maintenance, and troubleshooting of your gas mask to ensure effective protection.

2. Product Overview

- Available Models:

- CA-5M Dual-Filter Tactical Full Face Gas Mask
- CA-6M Tactical Full Face Gas Mask
- CA-7M CBRN Full Face Gas Mask

- Features:

- Advanced filtration system with a dual-filter design for maximum protection
- CBRN (Chemical, Biological, Radiological, and Nuclear) rated models

- Compatible with 40mm NATO size filters
- High-quality, durable construction for tactical and first responder use

- Accessories Available:
 - CBRNE Filters
 - Gas Mask Hose
 - 40mm NATO Size Gas Mask Plug

3. Safety Information

- Always ensure a proper fit before using the gas mask in hazardous environments.
- Replace filters regularly to maintain effectiveness.
- Inspect the gas mask for damage before each use.
- If the mask becomes damaged or unusable, replace it immediately to ensure safety.

4. Getting Started

- Unpacking:
 - Carefully unpack your gas mask and check all components.

- Assembly:
 - If your model includes removable filters or a hose, attach them securely before use.

- Fit Check:
 - Perform a fit check by ensuring the mask forms a tight seal on your face. Adjust the straps for a secure fit.

5. Proper Use Instructions

- Putting on the Gas Mask:
 1. Place the mask over your face, ensuring the filters are correctly positioned.

2. Adjust the straps for a snug, comfortable fit, ensuring no air leaks.

- Sealing and Adjustments:

- Adjust the straps on both the top and bottom to secure the mask tightly to your face.

- Breathing:

- Once sealed, breathe normally through the mask. If airflow feels restricted, check the filter for blockages or replace it.

6. Maintenance and Care

- Cleaning:

- Clean the mask regularly with a damp cloth and mild soap. Avoid using harsh chemicals that may degrade the materials.

- Storage:

- Store your gas mask in a cool, dry place away from direct sunlight. Ensure it's free from dust and contaminants.

- Filter Replacement:

- Replace filters after exposure to toxic environments or at least every 6 months for standard use.

- Inspection:

- Regularly inspect the mask for cracks, wear, and proper sealing.

7. Troubleshooting

- Mask not sealing properly:

- Ensure the straps are adjusted correctly and the mask is fitted snugly against your face.

- Difficulty breathing through the mask:
 - Check the filter for blockages or wear. Replace if necessary.

- Leaks:
 - Inspect the rubber seals for damage and replace them if necessary.

8. Warranty Information

- Coverage:
 - CANARMOR provides a warranty on the gas mask, covering defects in materials and workmanship. Please refer to the warranty section on our website for more details.
- Exclusions:
 - The warranty does not cover damage due to misuse or normal wear and tear.
